About Me

Finance and analytics professional with 25+ years of experience across various industries as a Finance Controller, Finance Analyst, and Strategic Business Partner. Specialized in FP&A, profitability strategy, and cost optimization, translating financial complexity into clear economic insights for executive decision-making. Rebuilt P&L and contribution margin frameworks to reveal true value drivers and strengthen strategic visibility. Advanced user of Excel and BI tools (Tableau), with working knowledge of SQL and Python to support data analysis and dashboard development. Known for combining financial rigor, data analytics, and strategic storytelling to turn complex data into clear, profit-focused business decisions.

Education

Tarumanagara University- Jakarta

Bachelor of Accounting | GPA 3.5/4.0 (Top 2 Graduate in Accounting)

RevoU

Full-Stack Data Analytics Program

Oct 2025 – Feb 2026

Completed RevoU's Full-Stack Data Analytics program, leading end-to-end analytics projects from data cleaning to executive ready insights using SQL, Python and visualization tools to drive data-informed decisions.

Working Experiences

GM Finance & Accounting - PT Niaga Nusa Abadi , A Cigarette Distributor , Jakarta

Apr 2020 – Mar 2021

- Built KPI-based management reporting to enable structured performance reviews and faster executive decision-making.
- Served as strategic finance partner to the CEO and Board, strengthening governance and elevating management reporting quality.
- Built a high-performing finance team, improving productivity by ~20% and strengthening controls to enhance audit readiness.

Project Manager Partner , PT Inti Sumber Baja Sakti - A Steel Distributor , Jakarta

Apr 2021 – Aug 2021

- Led end-to-end system implementation across Finance, Sales, and Operations, managing cross-functional milestones over a 5-month timeline and delivering go-live on schedule.
- Designed finance and operational reporting requirements, enabling more structured, consistent, and accurate performance tracking post-implementation.
- Ensured data quality and adoption by supporting data migration, validation, and user training across functions.

Project Experiences

REVOU Project - Revealing Sub-Channel Structural Value Engine Analysis, Online

Dec 2025 – Feb 2026

- Rebuilt sub-channel P&L and contribution margin using COGS benchmarks and activity-based cost-to-serve to assess true structural profitability.
- Analyzed multi-year demand patterns and cost drivers to isolate scalable profit pools, sizing Retail upside at ~6% growth with ~30% CM (~€14M incremental contribution scenario).
- Designed a Sub-Channel level scale / optimize / protect / exit playbook, including a 6-month Poland pilot project with quantified go/no-go thresholds.
